

NOVI

Technology for Business

Digitally Transform Your Business

Our Business Application Services

Business applications are the key solutions that your business needs to run efficiently and cost effectively. Novi can help you implement the applications that your business requires enabling better communication and information sharing.

Office 365

Microsoft Office 365 is a suite of essential cloud services and applications that increase productivity, communication and collaboration across your organisation. The service is delivered as an affordable cost - per - user model implemented and managed by Novi. There is also an option to include the latest version of essential office applications such as Word, Excel, Outlook, and PowerPoint across multiple device platforms.

Storage

Novi Storage for business is a simpler way to work together. Our storage solution helps your business grow without limits, while maintaining complete control over the critical company data.

Save files on your computer, then access the data on your phone, laptop and tablet on the move or from remote office location. All devices are synced automatically.

O365 Back Up

Novi has partnered with leading cloud technology vendors to deliver an independent backup service for Microsoft Office 365 Exchange email and SharePoint files. The automated daily Office 365 backup service ensures that you can both quickly recover data from any point in time as well as export your archives for local storage. The infrastructure is managed by experts, providing you with offsite cloud storage and backup.

Cloud Back Up

Novi backup is an end-to-end enterprise solution that consolidates backup and restores processes of customer data within minutes across the entire IT environment including servers, virtual machines, enterprise applications and databases, desktops and laptops. It works with any platform including Windows, Linux, MAC, iOS and Android environments.

O365 Applications

Sharepoint, Exchange and Skype for Business all improve collaboration and information sharing across an organisations. Staff are more productive and management more informed. Processes become streamlined and more effective resulting in cost savings and improvements in customer service.

MS Dynamics CRM

Microsoft Dynamics delivers more than a standard Customer Relationship Management (CRM) solution. It's analytical and campaign management capabilities delivers solid business intelligence that can drive sales productivity and marketing effectiveness. MS Dynamics will increase staff effectiveness and enable you to serve your customers better.
